Funct. 19:219-225(1994).

-i - FUNCTION: May play some role in signal transduction pathways.

-i - SUBCELLULAR LOCATION: Integral membrane protein. Lysosomal.

-i - SIMILARITY: Belongs to the tetraspanin (TM45F) family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         DB 1; Length 237;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                PROSTIE; PRO0259; TWroun.

human and mouse CDNA sequeces.";
Proc. Natl. Acad. Sci. U.S.A. 99:16899-16903(2002).
-!- FUNCTION: May play some role in signal transduction pathways.
-!- SUBCELDULAR LOCATION: Innegral membrane protein. Lysosomal.
-!- TISSUE SPECIFICITY: Strongly expressed in kidney.
-!- SIMILARITY: Belongs to the tetraspanin (TM45F) family. POTENTIAL.

US-09-133-599-2
is Gegreence 2, Application US/09333599
patent No. 6245898
GERREAL INFORMATION:
APPLICANT: Testa, Jacqueline E.
APPLICANT: Guigley, James P.
APPLICANT: Gardeline E.
APPLICANT: Gardeline E.
TITLE OF INVENTION: ASSOCIATED WITH TUMOR METASTASIS
TITLE OF INVENTION WONGLOCKATE
FILE REPRENEUR: SUNY
CURRENT APPLICATION NUMBER: US/09/333,599
CURRENT FILING DATE: 1999-06-15
NUMBER OF SEQ ID NOS: 5
SOFTWARE: PATENTIN Ver. 2.0
SEQ ID NO 2:
SEQ ID NO 2:
SEQ ID NO 3:
                        APPLICANT: Testa, Jacqueline E.
APPLICANT: Testa, Jacqueline E.
APPLICANT: Sendel, Marco
TITLE OF INVENTION: MONOCLONAL ANTIBOIDES THAT RECOGNIZE ANTIGENS
TITLE OF INVENTION: MONOCLONAL ANTIBOIDES THAT RECOGNIZE ANTIGENS
TITLE OF INVENTION: ASSOCIATED WITH TUMOR METASTASIS
FILE REFERENCE: SUNY
CURRENT APPLICATION NUMBER: US/09/499,781
CURRENT FILING DATE: 2000-02-08
PRIOR PILING DATE: 1999-06-15
NUMBER OF SEQ ID NOS: 2

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
